

# Agylia

Agylia Learning Content and Services

A top-down view of four athletes on a rowing machine. They are arranged in a vertical line, each in their own rowing seat. They are all holding the oarlocks of their oars, which are connected to a central shaft. The background is dark, and the lighting highlights the athletes and the metallic parts of the machine.

## We believe in the power of digital learning to transform organisations and their people

Our creative designers, media producers and learning consultants will work in collaboration with you to share their expertise on pedagogy, design, messaging and user experience to transform your learning and development programmes.

We use creative designs and innovations to produce appealing and effective learning solutions that increase engagement and improve knowledge and performance.

### **Our learning content and services include:**

- Bespoke eLearning and microlearning content
- Media production
- eLearning catalogues
- Learning consultancy

# Bespoke eLearning and microlearning

We combine creativity with the latest technologies to tailor bespoke eLearning and microlearning content that meets learning needs, creating meaningful and measurable experiences.

We work with organisations to enhance learning outcomes on topics such as induction and onboarding, risk and compliance, leadership development, sales training and other learning programmes.

We're experienced in exploiting new technologies and using a range of authoring tools to create learning content. We'll work with you, using the right technologies for your organisation and your learning needs.

## Some of the organisations we've worked with:

**Deloitte**

**e-on**

  
Foreign &  
Commonwealth  
Office

 **Microsoft**

  
**pwc**

# Engaging learning content

## Available on all devices

We create content that works across all platforms and devices, ensuring there are no barriers to learning. We'll work with you to design content that's available just how and when it's required by your learners.

## Knowledge checks

We can create standalone or integrated assessments, quizzes and surveys to assess learner knowledge.

## Gamification

Games and gamification are great ways to engage and motivate learners, helping to increase adoption and the ongoing use of learning resources. We are experienced at combining learning messages with game elements to make these experiences enjoyable, challenging and memorable.

## Translation and localisation

We know how to deliver translation and localisation of eLearning and microlearning content to provide each individual with positive learning experiences – wherever they are.

# Media

From photography, to animations and interactive videos, media is at the core of digital learning. Using the right mix of media, we bring learning messages to life to engage and inspire. Media is perfect for sharing expertise and creating authentic experiences.

Using our in-house media experts and production capabilities, we capture, narrate and produce a wide range of media – including videos, audio and photography – as standalone content or to enhance blended learning programmes.

## Video

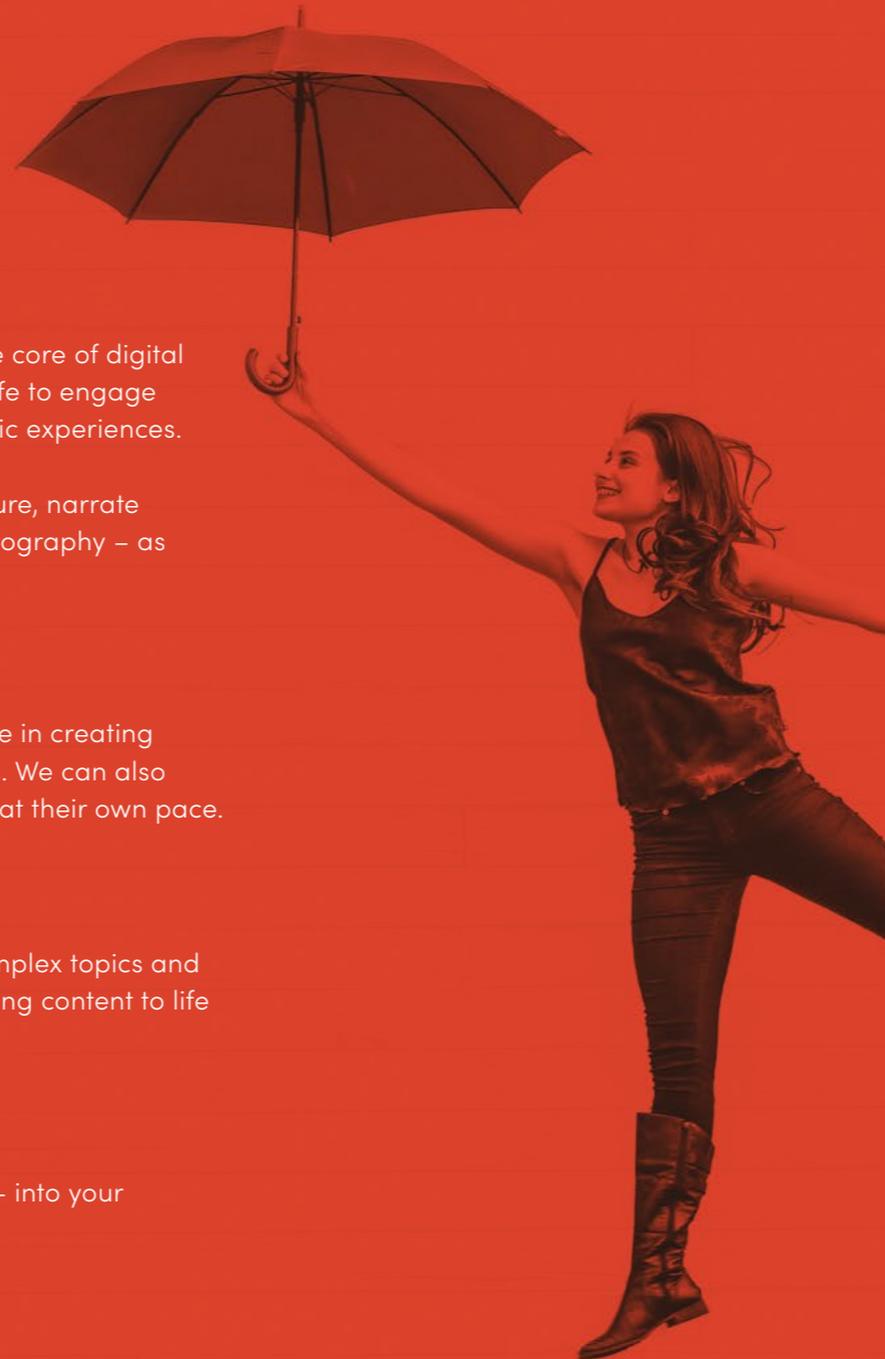

Video is a powerful tool for explaining complex topics. We have expertise in creating authentic video scenarios that visually communicate learning messages. We can also add interactivity to video content, allowing people to explore and learn at their own pace.

## Animation and simulation

An exciting way to simplify and energise any subject. Our team take complex topics and turn them into clear, concise and impactful learning messages by bringing content to life through animations and simulations.

## Third-party media

We can incorporate existing media – or that produced by a third party – into your eLearning and microlearning content.

# eLearning catalogues

Our range of eLearning catalogues provides learners with the essential skills and industry specific knowledge they need to become effective quickly.

The catalogues have been created with the help of approved and accredited subject matter experts, including the CPD Certification Service, the Institute of Leadership & Management, the Care Quality Commission, Skills for Care and the Institute of Hospitality.

The catalogues are continuously revised, ensuring learners are always up to date with the latest knowledge.

## Our catalogues include:

Foundation Skills  
Compliance  
Adult Social Care  
Contact Centre  
Health

Leadership Skills  
Financial Services  
Children's Social Care  
Housing  
Hospitality

# Consultancy

Using a performance consulting approach, we'll help you to address all your learning and development challenges.

We'll look at the learning needs across your organisation to identify knowledge and skills gaps.

Our consultants are experts in a wide range of learning delivery methods, including classroom, digital and mobile.

We'll advise and recommend bespoke strategies and solutions that are centred round your organisation's unique requirements.

# We're here to help

## Learning strategy

We're experienced at conducting training needs analysis and learner workshops to understand an organisation's culture. We'll get to know the people who will be experiencing the learning and the challenges they face. Then we'll help you to define your vision and learning strategy.

## Learning enablers

With a focus on learning experiences, we provide advice on learning enablers – including the use of gamification, video, animation and knowledge checks – to maximise the engagement and effectiveness of content and programmes.

## Learning delivery

We provide advice across a range of standalone or blended learning approaches – from classroom to mobile – and identify the technologies needed to support learning delivery.

# Do you need a platform to deliver your content?

## **Agylia Learning Management System (LMS)**

The Agylia LMS is an agile, mobile and social learning platform that enables organisations to schedule, target and deliver a wide range of learning content – including eLearning and microlearning courses, videos, podcasts, PDFs, weblinks and more.

The intuitive learner portal and Apps give individuals easy access to their learning content.

## **Agylia Mobile Learning Apps**

Agylia Apps, for iOS and Android devices, enable learners to access the content they need – even when offline – whether they're in the office, working away, at home or travelling.
