Agylia LMS

Rapid Implementation Service

Fully remote implementations are available

The selection and implementation of a new Learning Management System (LMS) need not take months. With Agylia's Rapid Implementation Service, your new LMS can be fully operational and your staff trained within just two weeks from our receipt of your order.

There is no need to take risks. There is no need to sacrifice quality. There is no need to compromise on future scalability.

The Agylia LMS gives you rich functionality, proven reliability and a cost-effective solution that will meet your needs NOW and into the future.

Feature highlights include:

Ease of use for learners and administrators alike

Mobile-ready responsive Web interfaces and native mobile learning Apps for iOS and Android

SCORM and xAPI compliance

Modern, highly visual user interface with your own branding

Ability to host and track eLearning, microlearning, videos, podcasts, spreadsheets, PowerPoints, PDFs, etc

Comprehensive reporting and analytics

Certifications with automated renewal processes

Continued professional development (CPD) module

Within two days of receipt of your order, we will:

1. Set up your own LMS administration portal with a standard configuration

2. Give you access to the administration portal with standard user profile fields, sender email addresses and certificate templates

3. Set up your learner portal (the learner's web interface) with standard branding

4. Help you to load content and user records

5. Grant you access to our support desk and second line support team

6. Help you to start delivering digital learning and reference materials to your people

1 STEP

Within the first two weeks, we will*:

1. Work with you to confirm your detailed requirements and configure the other aspects of the platform. We can move quickly through this process with you and can advise on the best practice

2. Agree with you what the system should look like and fully configure your user profile and organisational configuration data

3. Fully brand your learner portal

4. Personalise Sender email addresses, email templates and certificate templates

5. Enable a vanity URL for your learner portal

6. Enable Single-Sign-On (SSO) for your users

7. Publish your own, branded mobile Apps to the Google Play Store (Android) and App Store (Apple) (subject to the approval timescales of the App Store)

8. Train your LMS administrators with a series of live online webinars

2 STEP

In a timeframe that is comfortable for you and after the initial implementation has gone live, we will:

1. Continue to work with you, monitoring usage and ensuring that any refinements that you want are available and any issues resolved

2. Review any specific workflow related requirements, e.g. CPD configuration and approvals, task approval workflows, etc.

3. Identify with you any particular system integrations that you would like, e.g. into your existing CRM, CMS or HR systems

4. Define any requirements related to legacy data migration, and agree an implementation strategy

5. Support you with bespoke content creation and with off the shelf content libraries

3 STEP

* We know we can move fast, but we will need you to be able to provide any required information quickly as well. For example, your IT team need to be involved in setting up Sender emails addresses, SSO integrations, vanity URLs, etc. Your marketing team will need to provide relevant branding requirements and assets. We have template documents to streamline this process and will be there to guide and advise you all the way.
