

Agylia Learning Services

We can help you engage with large numbers of learners in different locations with high-quality, interactive courses that maintain consistent messaging, appearance and approach. We've completed many successful programmes and will work with you to ensure that your project achieves all of its objectives.

eLearning experts

Taking an innovative approach to eLearning and mobile learning, our team of experts know what works well and which pitfalls to avoid. We have helped clients overcome many different educational and technical challenges and are recognised as one of the leading and most inventive digital learning service providers.

We have vast experience in developing many different types of instructor-led and eLearning courses and can use either your expertise or our own subject matter experts to successfully create training in areas such as:

Policy education	Process training
IT and systems	Financial services
Cybersecurity	Induction
Legal and compliance	Medical
Engineering	Sales
Academic	Managerial
Performance support	Job-related

Instructional design and technical experts

We specialise in merging advanced instructional design skills with technical expertise. No other UK learning solutions company can match this combination of capabilities. It means that, as well as providing great eLearning, we can also come up with advanced technical solutions to the toughest challenges.

With expert educational consultants in both the UK and US, we can offer a full range of support services around the design and implementation of your training strategy. This might include training needs analysis, curriculum design, creating certification pathways and assessment methodologies and the design of blended learning programmes. We can also assist with business case analysis and preparation.

Our eLearning development team is experienced in the design and creation of stand-alone courses or a combination of learning resources – these might include a blend of classroom, eLearning, mobile learning materials, performance support tools and assessments.

Engagement methodology

Our experts will work with you to understand the learning domain, as well as the roles and responsibilities of your audiences. We will then ensure that the learning objectives are identified and documented before moving on to design individual courses or other learning materials.

We will continue to communicate with you at all times, providing formal review cycles and the opportunity for you to review and comment on the material. When the design is agreed, we move on to the creation phase, adding multimedia assets as required.

End-to-end services

We will be with you every step of the way – from giving initial advice, through course creation and delivery, to post-programme evaluation.

First, we help investigate the options that will best support your strategic and tactical business objectives, providing

clear, practical, down-to-earth advice on the most effective and cost-efficient route to follow.

Then, we can support you with training needs analysis and curricula design, identifying choices for assessment strategies and the design and creation of the range of training materials you need – in the form factor and technical format that is best for you.

The proven choice

We've completed many successful programmes for some of the largest, most demanding and prestigious companies in the world. They chose us because they wanted friendly service, together with advanced instructional design skills and technical expertise

We offer full educational consultancy services, including training needs analysis and curriculum design – as well as expert content consultancy, and design and creation services.
