

Agylia can work with you to help address all your learning and development challenges, from strategic planning to tactical solution development.

Agylia Consultants strive to understand the precise nature of the issues you are facing and then use their combined learning and technology expertise to provide solutions that deliver the results you need.

## Learning strategy

We can help you define a vision and strategy to ensure that future learning initiatives take full advantage of the latest technological and educational advances to support your organisational and strategic objectives.

Defining clear targets and performing training needs analysis can also help you identify the optimal learner centric delivery model, understand the technical delivery architecture requirements, and create outstanding learning content designed around well-defined learner needs.

We will be with you every step of the way, using our knowledge and experience to support your objectives.

## Learning delivery

Agylia Consultants are experts in a wide range of learning delivery methods, including classroom, digital and mobile - so can advise you on how to create blended learning solutions from existing classroom based programmes or traditional eLearning libraries.

Based on a detailed understanding of your learner's requirements, we create dynamic programme structures that deliver real performance improvement.

We can advise on the benefits and best use scenarios across a wide range of learning delivery methods, including:

### Mobile learning

We will take you through the whole process of designing and implementing fully responsive mobile learning solutions, supporting you from start to finish.

### Microlearning

We are experts in the use of short, sharp, impactful training nuggets. We will make it happen for you and we can do all the design and development work for you.

### Blended learning

We can design the optimum combination of different learning methods and components, design the blended curricula, develop the programme content and evaluate its effectiveness for learners. We will ensure you get the best possible programme for your learners.

## Learning enablers

Agylia Consultants are experts in empowering learning delivery to create more dynamic, engaging and effective programmes.

### Social learning

We understand how to increase learner engagement and optimise training effectiveness by leveraging the combined knowledge of all your staff.

### Gamification

We are experienced at creating game components within single learning courses or through the extensive range of features within the Agylia Learning Management System.

## Evaluation

Training programmes can be expensive to develop and deliver, so designing a robust evaluation approach to measure their effectiveness and value for money in delivering behavioural change is key.

## Learning systems

Agylia Consultants can advise on deployment options for your learning technologies, such as Learning Management System selection, adoption of mobile learning and performance support Apps, assessing the suitability of cloud based solutions, weighing up the pros and cons of different content authoring tools, and assessing options for Flash to HTML conversion.

## Learning Support

We can advise on a wide range of specialised and essential training related support. This might include project and programme management, training programme logistics and event management, delivery resource planning, and contingency management.

We have a proven track record of delivering large scale complex projects that demand a broad cross section of skills and will bring that experience to any projects we deliver for you.

## Agylia is the proven choice

Agylia has successfully supported some of the largest, most demanding and prestigious companies in the world in addressing their learning and development challenges

They chose Agylia because they wanted friendly service, innovative solutions and expertise in the very latest learning technologies.

## At a glance

Our friendly and experienced team has the proven ability to provide advice and recommendations for all learning related issues, including:

- Initial advice and consultation on educational strategies and related technical architectures.
- Blended or pure digital curricula design, complete with assessment and certification strategies.
- Microlearning programmes consisting of multiple short, focused mobile learning nuggets that create dynamic and highly flexible development curricula.
- Strategic and tactical consulting on best fit approach for moving from classroom to mobile centric or online learning formats.
- Advice on how to successfully incorporate gamification techniques, plus the creation of game rules – which positively enhance learner engagement and reinforce educational impact.
- Advice on appropriate use of social learning systems and effective deployment approaches, to introduce user-generated content that augments the learning and enhances learner engagement.
- Provision of guidance on appropriate evaluation approaches to adopt and how to embed reportable metrics in courses, programmes and curricula.
