

Agylia offers all the benefits of the very latest microlearning technology in a proven solution that will help you reach your goals – now and in the future.

With the Agylia Learning Management System (LMS) you can manage and deliver microlearning content, including courses, assessments, quizzes and surveys.

You can transform the way people learn, using short, bite-sized content that builds long-term knowledge and supports learners by giving them access to the knowledge and skills they require – wherever they need them.

Everyone across your organisation can make learning part of their everyday life.

## A place for all your learning

With the Agylia LMS, you can distribute any digital learning assets, including your microlearning content, eLearning courses, videos, eBooks, games, surveys, PDF and Office documents, and much more.

## Multi-device learning

Agylia enables all learners – whether they're in the office, at home, travelling or working away from their normal office location – to access microlearning and other digital learning content wherever they are, via desktops, tablets and mobile devices.

Using the Agylia mobile learning Apps, which are available for iOS and Android devices, learners can access content when they're offline. Agylia still tracks all the learner's

interactions for seamless resynchronisation with the LMS when they're next online.

## Spaced learning for long-term knowledge retention

Agylia helps you deliver microlearning programmes over a period of days, weeks and months.

Use proven memory-building techniques, such as spaced repetition and repeated retrieval – including the use of quizzes and knowledge checks – to help learners build knowledge, retain information and improve performance.

You can use Agylia to schedule and automate content delivery, so providing microlearning programmes could not be easier.

## Powerful search capabilities

Agylia has powerful search capabilities that enable learners to search for and access the short bursts of knowledge they need, in the focussed learning experiences they want – all in a way that reflects how they choose to access information in their daily life.

In today's constantly connected world, people want access to information fast and always have it at their fingertips.

## Increase engagement with social learning

Many organisations are beginning to explore the benefits delivered by enabling their learning community to share knowledge and experiences with one another.

Agylia's fully integrated commenting capabilities enable learners to start and join conversations around experiences of content items, such as microlearning and eLearning courses, videos and other performance support documents.

Social learning is also supported with content discussion boards, content rating and the uploading and sharing of user-generated content.

## Challenge learners with gamification

Recognise the positive influence that gaming principles can have on both content and learning programmes.

Agylia provides you with a flexible engine that enables system wide gamification options. These include competitive leaderboards, points and achievement awards'

## A complete picture of learning across your organisation

By supporting SCORM and the latest Experience API, Agylia tracks all learner interactions – your microlearning and digital learning content are tracked, recorded and made available for reporting.

## Internal and external audiences

Agylia is designed to serve the extended enterprise, supporting your own staff, as well as users outside your organisation – such as suppliers, distributors and customers.

Agylia enables you to operate multiple individually branded sub-portals for your customers or different business units.

You can deliver all your microlearning and other types of content to various groups of users on a global scale. Administrators can easily add and target microlearning content, courses and curricula. Delegated administration enables nominated staff to manage different groups of users, large or small.

## Agylia is the proven choice

Agylia has been successfully implemented by some of the largest, most demanding and prestigious companies in the world.
